

When you Clean your cloth face covering

We recommend that you wash your face covering daily

Use regular laundry detergent in a washing machine

Here are some other ideas for washing your face covering when you do not have access to laundry facilities daily.

Fill your sink or a basin with hot water and laundry detergent
Kitchen sink water is set at a temperature of 120 degrees Fahrenheit

This method would be considered cleaning your face mask and is acceptable for daily cleaning.

Once a week, you should deep clean your face covering by being sure the water temperature reaches at least 132.8 degrees Fahrenheit.

The boiling point of water is 212 degrees Fahrenheit

- fill a large pot with water and bring it to a boil
- Place your face-covering in the boiling water for 2 minutes

The World Health Organization found that 132.8 degrees Fahrenheit is sufficient in killing germs on a cloth face covering

DO NOT place your face-covering in Microwaves or Dishwashers
This is not recommended and can result in fire or not proper sanitization of your face covering.
